# **Anatomy of an Experiment**

For **{customer segment}**, we believe that **{outcome}** will happen when we run **{experiment description}**

# Forming an Hypothesis

## Testing & Learning Card

### Test Card

Test Name	Deadline
Assigned to	Duration

STEP 1: HYPOTHESIS

We believe that

Critical: 

STEP 2: TEST

To verify that, we will

Test Cost:  Data Reliability: 

STEP 3: METRIC

And measure

Time Required: 

STEP 4: CRITERIA

We are right if

Copyright Strategyzer AG The makers of Business Model Generation and Strategyzer

### Learning Card

Insight Name	Date of Learning
Person Responsible	

STEP 1: HYPOTHESIS

We believed that

STEP 2: OBSERVATION

We observed

Data Reliability: 

STEP 3: LEARNINGS AND INSIGHTS

From that we learned that

Action Required: 

STEP 4: DECISIONS AND ACTIONS

Therefore, we will

## **Anatomie of an Experiment Template**

- 1. Which hypothesis do you want to prove or disprove?**
- 2. For each hypothesis, what quantifiable measure indicates success?**
- 3. Who are the target participants of this experiment?**
- 4. How many participants do we need?**
- 5. How are we going to get them?**
- 6. How do we run the experiment?**
- 7. How long does the experiment run for?**
- 8. Are there other qualitative things to learn during this experiment?**

—  
**Prioritize Assumptions and Hypotheses**

### Concierge

**„Concierge Experiment“ means that you openly act as the product or service (not hidden like in Wizzard of Oz).**

# **Formative vs. Summative**

—

---

## **Formative Usability Evaluation**

**Formative evaluation is a type of usability evaluation that helps to "form" the design for a product or service. Formative evaluations involve evaluating a product or service during development, often iteratively, with the goal of detecting and eliminating usability problems.**

## Testing

# NUMBER OF TEST USERS

Vgl: [Nielsen Norman Group - Why you only need to test with 5 users](#)

**Summary: Elaborate usability tests are a waste of resources. The best results come from testing no more than 5 users and running as many small tests as you can afford.**

Nielsen Norman Group

„If a **picture** is worth a thousand  
words, a **prototype** is worth a  
1000 meetings “

Saying at IDEO

**Low Fi vs. Hi Fi**

# Tips

- When creating a mockup keep in mind: **What do I want to test?**
- Fully interactive Mockups are time-consuming. **Split your mockup** into testable segments to save time.
- Ensure the programs in your workflow can talk to each other.

# Thank you!
